Subject: Microsoft Settlement

I ve worked with M.S. products since DOS 2.2 and have been the I.S. director for an engineering firm in Toledo Ohio for a number of years. Based on my experiences with M.S. I have no doubt they have consistently worked to stifle and destroy their competitors where ever they can. I firmly believe they will attempt to continue to do so by any means they can. I DO NOT feel the proposed settlement goes far enough and amounts to little more than a slap on the wrist! If this settlement goes through as currently proposed MicroSoft will continue to work to maintain its illicitly gained dominance and further erode competition and innovation in the software marketplace.
